Power (HP):	70 - 90hp

Description

Robalo R160 centre console

WE PROMISED YOU A GAME CHANGER, HERE SHE IS.

We promised you a game changer and that's exactly what the action-packed new Mercury or Yamaha powered R160 delivers. Sized perfectly for first time boat buyers and skilled boaters alike, the R160 redefines what you can expect in a 16-foot center console. Robalo's Pricing makes the buying experience pure pleasure. The truth is that you have a sea of choices at 16-feet. And yes, the competition does it right...the difference is the R160 just does it better. Get onboard, your family weekends will never be the same. Under the gelcoat you'll enjoy classic Robalo quality through and through. Same durable Kevlar construction as our bigger center consoles. Same high quality stainless steel hardware. Same top tier vinyl and rich foam padding. Same precise attention to detail. It might be the smallest center console in the Robalo line-up, but it's big on quality, bigger on performance and supersized when it comes to family fun on the water. Best of all it's a Robalo through and through, no short cuts here. None.

Let's get down to the business. At the helm, you'll enjoy a feeling of total and complete control. There's room on the console for optional electronics. Water resistant switches are clearly identified. The full height windshield has a flex free aluminum base for added strength. Small items stow atop the console and there's a huge ice chest below the reversible leaning post seat. Stainless steel drink holders combine with a secure grab handle, showcasing Robalo's attention to detail. A molded non-skid footrest is a huge plus, creating a secure feeling in rough water. Tilt steering is available as optional equipment. The removable backrest cushion opens up to reveal a console storage compartment. A seat cushion and rod holders are available as optional equipment. Finally, for those facing a low profile garage or boat house challenge, a clever optional fold-away windshield provides that little extra clearance needed.
